

# Three Simple Steps For Moving into the Technology Space

## Three Guidelines

**Know yourself** and understand your interests and what excites and challenges you

**Identify allies** or mentors to help guide you throughout your journey

**Have a tentative goal**, and do not be afraid to change direction as your interests change

## Steps in the Right Direction

- 1 Explore** interests through projects or integrate them into your current line of work
- 2 Build strong relationships** with individuals who can help you and network strategically
- 3 Adjust your plan** according to you new interests or new situations that arise
