# Human + Al: The Future of Intelligence

Kristin Day Health.Al

# Hello! I am Kristin Day

I am here because I love creating Artificial Intelligence systems using Python!

- teach python (data science)
- work with python
- have fun with python

You can contact me at kday@healthai.us

We'll be discussing using Python for Al development. But, first . . .

## What is Al?

66

"Artificial intelligence is the science and engineering of making computers behave in ways that, until recently, we thought required human intelligence."

**Andrew Moore**, Former-Dean of the School of Computer Science at Carnegie Mellon University

#### Types of Al

#### Narrow

Current state of Al: Models and systems can only handle the information they were built to handle or the data they were trained on. Computers cannot generalize to unseen/unlearned situations.

#### General

Like human intelligence: Can generalize information about dogs and cats to other animals (for example).

## Should we fear that Al will take over the World?

## Short Answer:

No! The current state of AI is lifetimes away from general AI. This means, computers can only do what we train them to do.

### Long Answer:

There are still ethical concerns with Al. If we feed Al systems biased data, we will get biased results. This can have real life consequences for people. Examples: mortgage lending and employment applications.

- **Great Library Ecosystem**
- Easier to learn than other languages (low entry barrier)
- Flexibility
- Platform Independence
- Readability
- **Good Visualization Options**
- © Community Support
- Growing Popularity

### PYTHON FOR AI

What is the biggest barrier to Al?

## Data

Stone Bontaet, eom

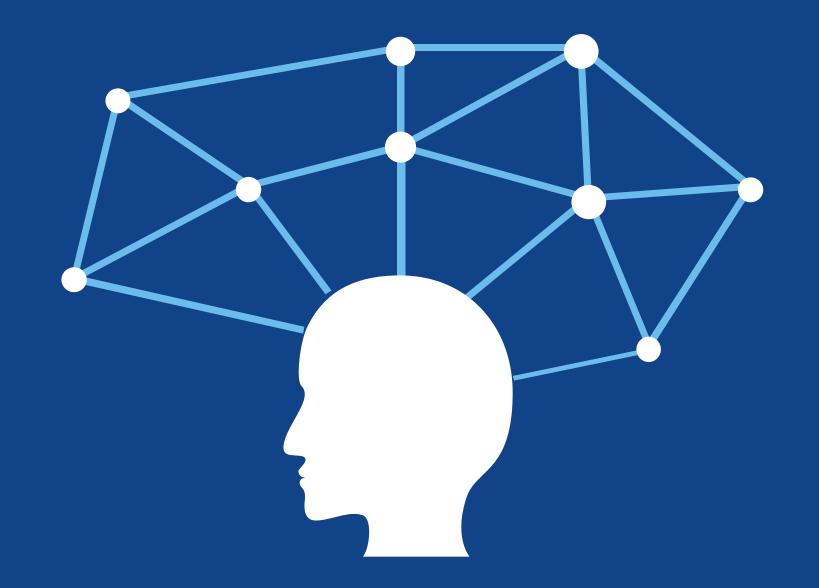

# Start thinking of data as an asset!

How do we value data as an asset?

# How do we value Al systems?

# Human in the Loop

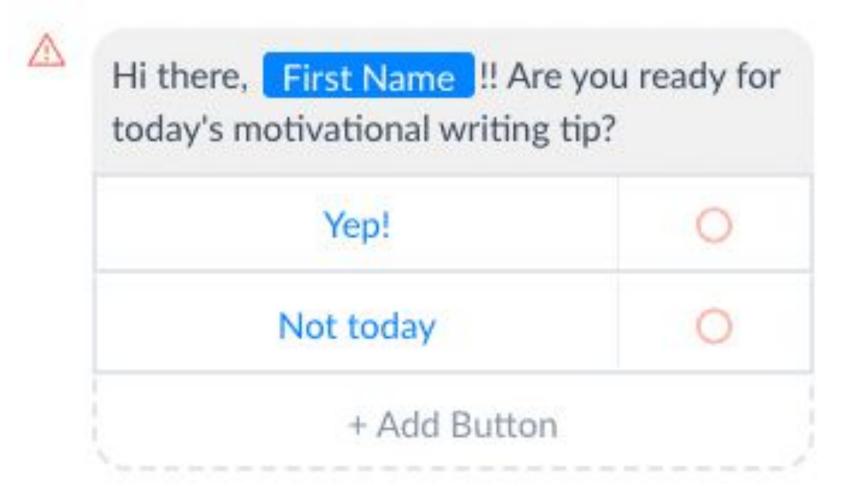

Why integrating human action and AI is the cutting edge of AI technology?

## Clean Data

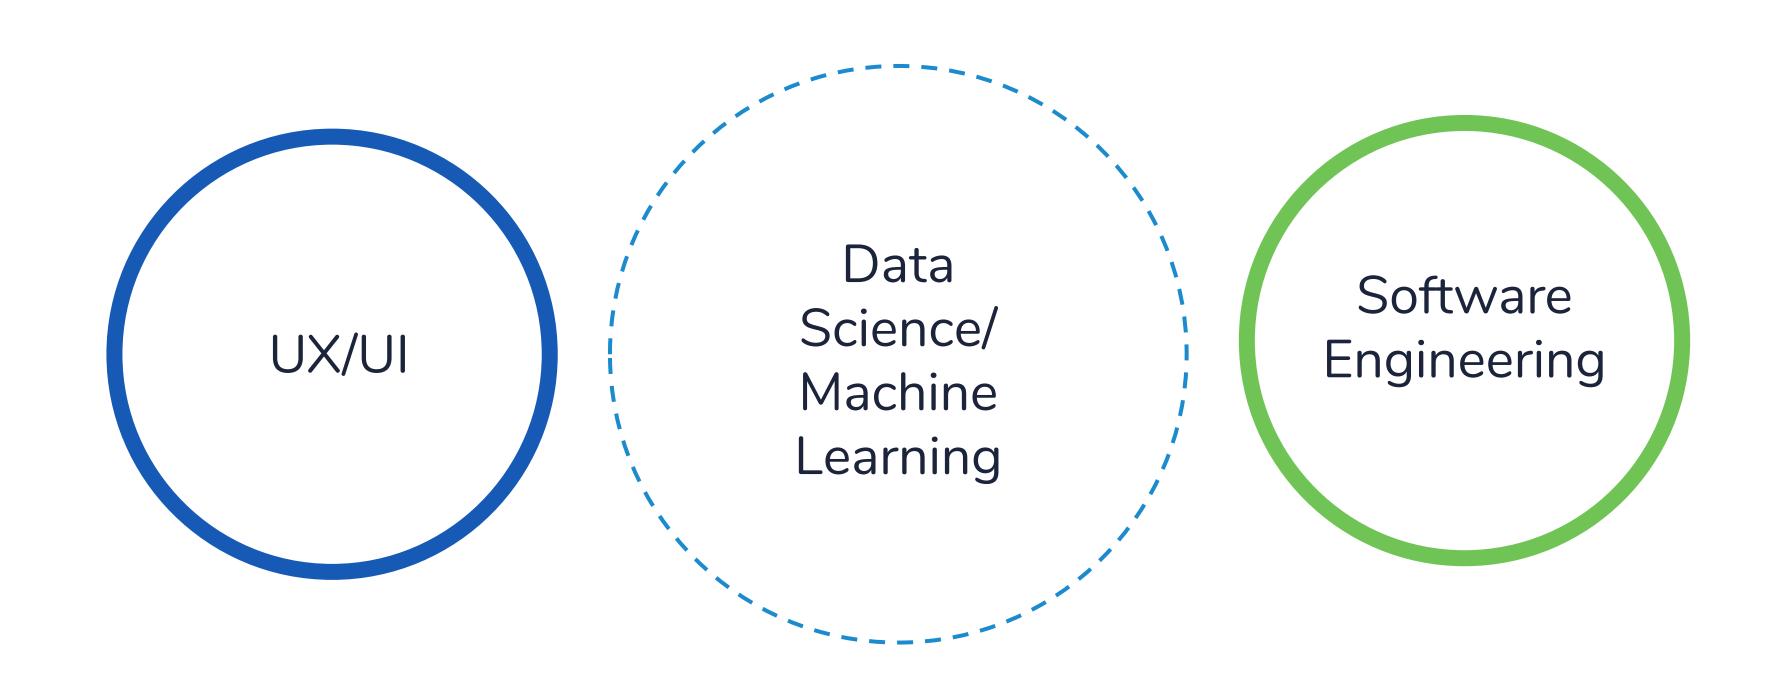

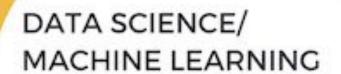

Send Message #1

### What is Required?

DETAILS: USE THE
DATA TO CREATE
PREDICTION MODELS

USE THE PREDICTIONS

DETAILS: FEED THE PREDICTIONS BACK INTO THE PLATFORM

DATA

DETAILS: CLEAN, ORGANIZE AND STORE DATA

#### HUMAN USE SOFTWARE PLATFORM

UX AND SOFTWARE ENGINEERING CREATE A PLATFORM THAT HUMANS USE WITH DATA COLLECTION ON THE BACK END.

# Thanks!

Any questions?
