Eleven Fifty Academy

Recode Your Future

Connor Mullett - Lead Python Instructor

Timeline for this presentation

Eleven Fifty Academy

1. What is ElevenFifty Academy
2. Crunching the Numbers
3. What ElevenFifty Academy does for students
4. Intro to Code & Guiding your Course Decision
5. Wrap up & Questions (Time Permitting)

What is ElevenFifty Academy

- We're a 501(c)(3) nonprofit dedicated to bridging the tech talent and tech literacy gap in Indiana
- Founded in the house of Scott Jones in 2014
- Moved to Launch Fishers in
- The first coding boot camp in Indiana and the only coding boot camp to separate courses by language, rather than buzz words
- We train developers, fast
- Utilizes a project-based workflow, rather than memorization and tests

Eleven Fifty Academy

90% GRADUATION RATE

25% WOMAN STUDENTS

81% JOB PLACEMENT RATE

Average Starting Salary: $51,000 (with several starting between 55k-82k!)

*Numbers based on 2017-2018 data

What is ElevenFifty Academy

Eleven Fifty Academy

- Courses include .NET, JavaScript, the recently added CyberSecurity, and Python of course
- Two different curriculum models: A 3-month, full-time, full immersion course and a 6-month part-time course
- Full-time courses are 9-5 monday through friday. Recommended for individuals who have family or financial support
- Part-time courses offer in-person classes on Monday and Wednesday evenings from 6-9 pm, and on Saturdays classes from 9 am to 1 pm.
  - These courses are still ElevenFifty
  - Recommended for those who still need to work to make ends meet
  - Currently, the only part-time courses available are JavaScript and CyberSecurity (Python soon to come)

What do we do for students?

- Financial assistance - 85% of students use some sort of tuition assistance
- Lunch provided daily (full-time only)
- A rich and team driven community to cooperate and compete with
- A collaborative environment that is designed to help students succeed
- We give students the tools, resources, and knowledge needed to survive in the world of software development

Tools and Skills Students Learn

- Version Control Software
- Using Github and other development platforms
- Deploying to cloud environments
- Utilizing Package Managers such as npm, pip, and nuget
- Utilizing and configuring relational databases with PostgreSQL and SQLServer
- Ability to be a part of the entire software development lifecycle and deliver quality software
- Googlefoo
- Workshops to broaden horizons and introduce rabbit holes for students

Workshops

- Workshops are classes tailored for specific material to introduce and deliver new material from an outside perspective
- All workshops are taught by industry professionals
- Topics include Agile and Scrum, DevOps, soft skills and interviewing, resumes, security, intellectual property, UX/UI, web design, and more
- Most workshops are meant to allow students to understand explore different fields in IT
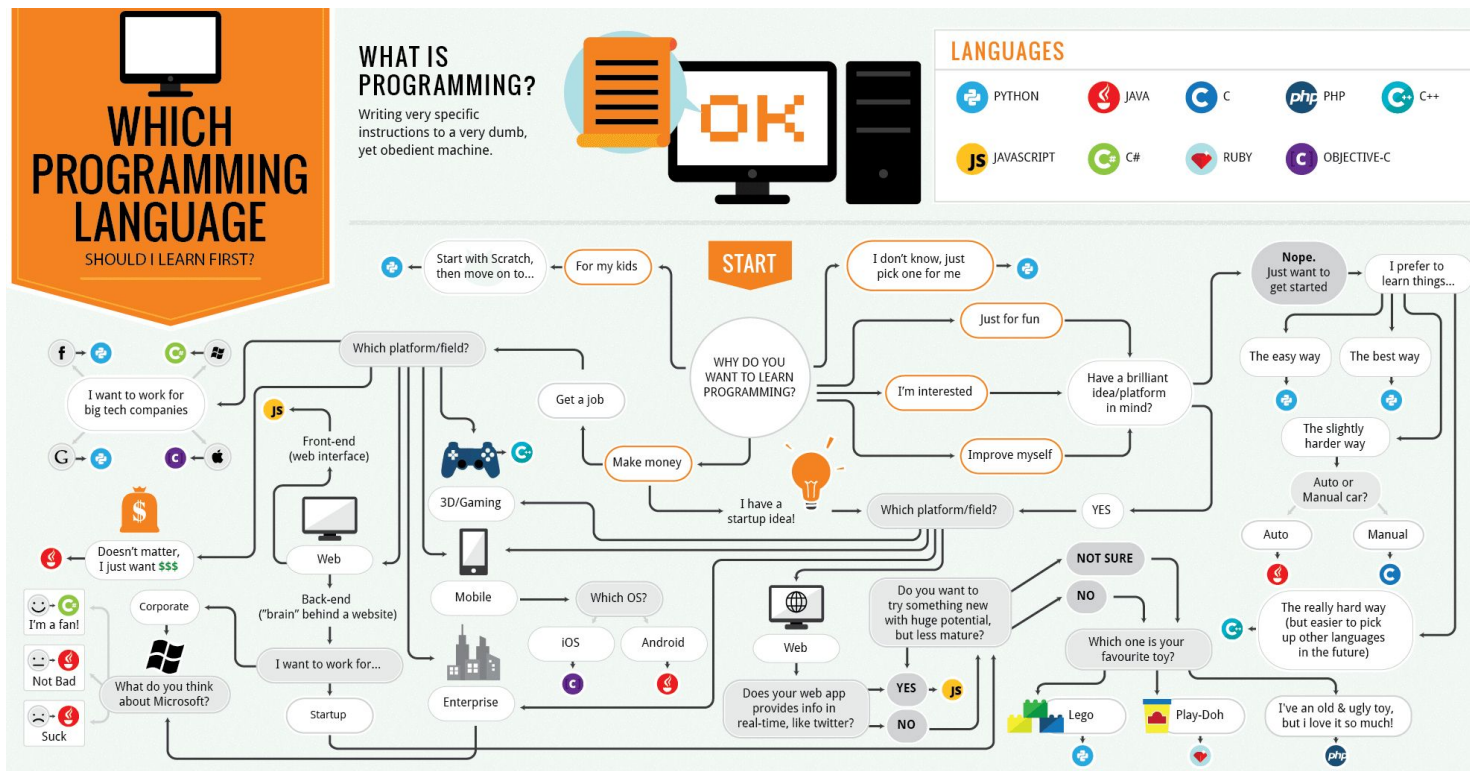

Intro to Code

- Two times a month, every other week
- Get a feel for the school before you join
- Learn the basics of HTML and CSS in a half day class at the pace of our full-time courses
- Leave with a project to tweak and show off to family and friends
- Meet with our admissions team, instructors, and potentially fellow classmates
- Now mandatory attendance for all incoming students
- Check elevenfifty.org for dates and times

Guiding your Course Decision

Recode your Future

- Individuals who are not interested in college and want to get into a career now
- People who are trying to learn a new programming language
- People who want to switch careers fast, or can go to school part-time and work at the same time
- People who code as a hobby, but don't know where to go or need guidance and direction
- Veterans - We offer GI Bill benefits so you can do "boot camp" all over again
